Fitchburg DPW – Division of Water Supply

Fitchburg, Massachusetts

As required by the US Environmental Protection Agency (EPA), our water system has sampled for a series of unregulated contaminants. Unregulated contaminants are those that do not yet have a drinking water standard set by EPA. The purpose of monitoring for these contaminants is to assist EPA in deciding whether the contaminants should have a public health protection standard.

The results of Fitchburg's testing for Unregulated Contaminant in 2015 are as follows:

Unregulated Contaminant	Date(s) Sample(s) was Collected	Result or Range Detected	Average Detected
